

DicoTech-INFOGISTIC™ specializes in providing **Information Security** consulting services

INFORMATION SECURITY SERVICES

Information Security means protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording or destruction. For any organization, it is imperative to safeguard its information from potential threats and hence requires an IT/Cyber Security Strategy to counter such threats.

DicoTech-INFOGISTIC specializes in providing Information Security consulting services. We have a dedicated team for consulting and professional services for information security. DicoTech INFOGISTIC also partners with the leading information security solution providers, including IBM, Kaspersky Labs, Sourcefire, GFI and RSA.

DEFENSE-IN-DEPTH APPROACH

By using a defense-in-depth approach, the company's consultants ensure that the client has the right process and technology controls at all levels within the organization. The consultants design the process based controls by taking input from the industry's best practices and standards such as ISO 27001, ISO 20000, ISO 385000, ISO 22301 etc. The technology services team engages with DicoTech-INFOGISTIC customers to identify & implement solutions such as Endpoint Protection, Data Protection, Network Security, GRC, SOC, Vulnerability Management, and Identity & Access Management.
